## EU REPORT ON SOCIAL SERVICES OF GENERAL INTEREST

Generally, health and social services play a significant role in the economies and societies of the EU Member States. They meet essential social needs, generate employment on a large scale and contribute significantly to GDP. Yet, at the moment, their importance varies widely across the EU. Their economic, social and employment potentials are clearly underdeveloped in certain Member States. Public perceptions show that, as a result, social needs are insufficiently met and expectations are frustrated.
